Who owns Eesti Energia?

The main raw material for energy production - oil shale - is extracted from mines located in Eastern-Estonia and owned by the company. The group of Eesti Energia has three main operation areas: electricity generation, shale oil production, and sale and distribution of electricity. Its shares are owned by the Government of Estonia.

Who sells electricity in Estonia?

In Estonia's electricity market, Eesti Energia is the largest seller with a 60% market share and owns the largest distribution network, representing 86% of the distribution market. The Estonian Competition Authority (ECA) regulates transmission and distribution rates, as well as connection charges. Electricity in 2020:

Which Estonian cities use eco-friendly district heating?

The company supplies more than 1000 buildings in seven Estonian cities with environmentally friendly district heating around the clock: Haapsalu, Järvepea, Keila, Kõrvala, Rapla, Valga and Paide. Most of the heat consumed by customers is produced from domestic renewable fuel.

When was Eesti Energia founded?

Eesti Energia was founded in 1939. In 1998, it was reorganized from the state enterprise to a private limited company. In 1998-1999, two distribution companies (Lõuna- ja Põhja-Eesti Elektrivõrk and Narva Elektrivõrk) were separated from Eesti Energia and privatized.

Where does Estonia's energy come from?

The rest of Estonia's generation is from other renewable fuels. Wood-based fuels were the second largest source of power in 2016. The rest comes from waste and other biofuels, as well as a small amount of hydropower.

Other technologies, such as liquid air energy storage, compressed air energy storage and flow batteries, could also benefit from the scheme. Studies suggest that deploying 20GW of LDES could save the electricity system \$24bn between 2025 and 2050, potentially reducing household energy bills as reliance on costly natural gas decreases.
