

What is an IGUs energy chain system?

igus energy chain systems designed to guide and protect energy, data, signals and fluids together in one system. Find out more about igus cable carriers here.

How many customers use IGUs energy chains?

Across the globe, more than 400,000 customers from 50 branches of industry use igus energy chains. Energy chains from igus as energy supply for indoor crane under adverse conditions. Across the globe, more than 400,000 customers from 50 branches of industry use igus energy chains. What are energy chains? What are the advantages of energy chains?

What are energy chains?

energy chains (also called energy supply systems, drag chains and cable carriers) are mechanical machine elements used to guide and protect energy, data, signals and fluids together in one system, whilst withstanding the most diverse environmental conditions.

5:11 6 days ago All New! Smart Plastics EC.W Indicator. Learn about the brand new EC.W wear indicator for e-chain systems in this video. e-chain Product Manager Rob ...

Beyer Maschinenbau GmbH was looking for an energy supply system that provides the stability and durability needed in its machines for the beverage industry. The E4.1L energy supply system from igus meets more than these ...

Energy chain system E2.21: strong, quiet, easily openable, inner height hi: 21.2mm igus-icon-lieferung 24 igus-icon-lebensdauerrechner igus-icon-cad-dateien CAD ??? ??? ???

Quick online design of ready-to-connect energy chains. With the energy chain configurator "e-chain expert", you can assemble your individual ready-to-connect energy chain system in just a few steps. Quick and easy online design Display price, service life and delivery time Share the current processing status

Secure and streamline your operations with our energy chains and systems, designed for superior protection and energy supply management. Please choose your delivery location ... The E4.1L energy supply system from igus meets more than these requirements. Due to its design, it is easy to fill and assemble while being cable-friendly at the same ...

You only need a screwdriver to assemble each series. The following assembly instructions include several pictures to describe how to assemble or disassemble each series. For some series, videos explain how to assemble the energy chain. The instructions are sorted according to the sizes of the energy chains, 3D movements and special solutions.

1. The E2.1 micro system for very small spaces. The E2.1 micro system is a very small, one-piece or two-piece energy chain that is lightweight and thus ideal for highly dynamic applications. Compared to igus® types of the same design, the E2.1 micro energy chain also offers a robust stop-dog system for up to 25% greater unsupported length and 100% ...

The special features of these igus® energy chain ranges are their high stability and quiet running. All systems can be opened on two sides and equipped with various mounting brackets. Unsupported applications, e.g. for spreaders, are as reliable ...

igus® cable chains also known as energy chains are suitable for many applications in all industrial sectors. They supply energy and data to the machines safely. ... Thanks to a Kanban procedure, the customer receives the ready-to-install energy chain systems just-in-time at the installation location, as a result of which installation times are ...

E1 System energy chain in one strip Modular, one-piece band for simple applications. Cost-effective solution for large numbers. E1 system - overview ... And igus® special solutions Older energy chains are also available on a continuing basis. For new constructions, we recommend the corresponding new identical e-chains®; ...

igus®, inc. USA/Canada igus® Energy Chain Systems®; 10.68 Strain Relief Elements for Energy Chains®; with igus® Chainfix Clamps and Saddle Clamp Elements The Chainfix clamp system design principle has proven itself as effective, life-prolonging strain relief for igus® Energy Chain Systems®; Important improvements are offered by igus ...

Several E4.1 series energy chains were installed to guide the cables to the pipe laying tower and the tensioner on a pipe-laying vessel. They move the numerous cables safely and are ...

Quick online design of ready-to-connect energy chains. With the igus® energy chain configurator "e-chain®; expert", you can assemble your individual ready-to-connect energy chain system in just a few steps. Quick and easy online design Display price, service life and delivery time Share the current processing status

Energy Chains are also commonly referred to as power chain, drag chain, cable chains, cat track, cable carriers etc. Our range of Treotham Energy Chains includes: Circular Movement with twisterchain; E-spool, liftband and energy chain in zig-zag configuration for vertical applications; Easychain for cable laid on the inside or outside

The igus® product range consists of more than 100,000 innovative products available from stock extending from the small micro flizz®; energy chain through to very large energy chains with inner heights of 350mm.

Polymer energy chains for every movement. Filter according to dimensions, load and dynamic data and get the result quickly. A pre-selection of recommended energy chains makes it easier to find and supply energy in your application. Experts can find a total overview of all igus energy chains on the right.
