### **Euston energy Djibouti**

How does electricity supply work in Djibouti?

Electricity supply services are provided through the vertically integrated utility Electricité de Djibouti (EDD). A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options. [citation needed]

#### Can Djibouti develop geothermal energy by 2025?

Located along the northern edge of the African Rift Valley, Djibouti is in a prime location to develop their geothermal resources. The Government of Djibouti has set their sights on developing 50 MWof baseload geothermal energy by 2025.

#### What is Djibouti's Vision 2035?

Djibouti's Vision 2035 aims to achieve universal electricity access and power the nation with 100% renewable energy. Already, it sources approximately 65% of its electricity from Ethiopia (mainly hydroelectricity; renewable) via an intertie, reducing its reliance on imported fossil fuels.

#### What did EAGP do for Djibouti?

EAGP provided on-site supervision and feedback on daily drilling reports for the first slim hole exploration well drilled by the Government of Djibouti at the Gale Le Koma geothermal prospect. A slim hole well is a lower-cost option for proving a geothermal resource than a traditional wide-bore well.

#### Why is Djibouti's production so low?

Despite having an installed capacity, Djibouti's electricity production is lower due to old and inefficient equipment. Most demand comes from the city of Djibouti, which has been growing at a high rate of 5 per cent a year.
