Does Ampd Energy's enertainer cost more than a diesel generator?

Ampd Energy said its Enertainer, while costing more than diesel generators in the short-term, will lead to long-term savings given significantly lower running costs. The container-shaped energy storage system can be rented or bought outright.

What happens if you unplug a generator board?

The board also seems to be working to a degree, the "Economy" function works and slows the engine when there is no load. Unplugging the board makes the generator run out of control and bounce off the rev limiter. When plugging in the alternator to the board, voltage drops from 300v down to 1.7v.

Will Singapore replace diesel generators with lithium-ion batteries?

Hong Kong start-up Ampd Energy said five construction sites in Singapore will be replacing diesel-powered generators with its advanced, lithium-ion battery as developers and contractors in the Republic seek to dramatically cut noise and pollution from building activities.
