What is Fiji's national energy policy 2023-2030?

Fiji's National Energy Policy 2023-2030 is the blueprint towards a highly sustainable, inclusive, reliable, and affordable energy services sector by the close of the decade. It sets a strong policy foundation for the transformational investments that are urgently needed to revolutionise our energy sector for the better.

What is the future of Fiji's energy sector?

The future of Fiji's energy sector will continue to be shaped by these factors. Today, as much as 60% of Fiji's electricity generation is derived from hydropower while remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels.

What is Fiji's energy policy?

This Policy will ensure that Fiji's agricultural sector and local industries can benefit from a further source of sustainable, indigenously-sourced energy while minimising any potential impacts on the environment or national food security.

Why does Fiji rely on fossil fuels?

National energy production and consumption in Fiji remains highly dependent on imported fossil fuels in part due to the current demands of the transport sector and the ongoing reliance on thermal power plants to supplement renewable energy sources within Fiji's electricity sector.

How does Fiji generate electricity?

Today, as much as 60% of Fiji's electricity generation is derived from hydropower while remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels. The growth of Fiji's land transport sector has been largely concentrated around growing urban centres.

How does Fiji ensure long-term energy security?

The Fijian Government seeks to ensure Fiji's long-term energy security by increasing the availability of data and information required to support investments designed to increase the reliability and resilience of the national energy infrastructure.

Fiji's energy services sector faces challenges unique to the nation's geography, namely, providing energy across over 100 populated islands, the scale-related challenges of our small energy market, and an extreme susceptibility to external shocks in managing the evolution of Fiji's ...
