Finland jascon energy

Why do some companies work with Jascon?

That's why some of the best know companies work with us. Jascon believes in the future of electric vehicles. We make lithium-ion battery packs for such buses and trucks, delivering a cleaner and safer solution than other powertrains with reduced noise levels and localized emissions. Our design for a rechargeable battery pack is safer and better.

What is Finland's Energy Policy?

Finland's approach includes nuclear energy, more renewables for electricity and heat, improved energy efficiency, and economy-wide electrification. After Russia's 2022 invasion of Ukraine, Finland moved to cut Russian energy imports, which previously comprised 81% of crude oil, 75% of natural gas, and 19% of electricity imports in 2021.

How did Finland's energy mix change from 2011 to 2021?

From 2011 to 2021, Finland experienced a significant shift in its energy mix. The share of fossil fuels in Total Energy Supply (TES) declined from 53% to 36%, with decreases seen across all types: oil (26% to 21%), natural gas (9.6% to 6.4%), and coal (11% to 6.3%). Peat's contribution to TES also decreased from 5.8% to 2.7%.

What is Finland's energy supply in 2021?

In 2021, Finland's Total Energy Supply (TES) comprised bioenergy and waste (33.6%), oil (20.8%), nuclear (18.5%), coal (6.3%), natural gas (6.4%), electricity imports (4.6%), hydro (4.1%), peat (2.7%), wind (2.2%), and heat (0.6%).

Who sells natural gas in Finland?

Gasumis the Finnish importer and seller of natural gas, which owns and operates Finnish natural gas transmission system. Natural gas vehicles aren't popular in Finland, but natural gas powered busses exist.

What is Finland's energy consumption?

Finland's per capitaenergy consumption is notably high, driven by its heavy industry sector and significant heating requirements due to its cold climate. In 2021, the industrial sector was the primary consumer of energy, accounting for 52% of Total Final Consumption (TFC)--above the International Energy Agency (IEA) average of 36%.

emissions. Our ...

Finland gets 29% of all its energy needs from advanced biofuels. It also has extensive nuclear and hydro networks. But some of its bold targets for continued fuel-use improvement call for sustained government intervention. One example being the goal of powering 30% of all transport with green energy by 2030. It also hopes to reduce personal car ...

Finland: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Serge Energy main focus is the production and sale of renewable energy within the growing European market.
