

Is Sardinia a fully renewable independent power system?

The 112-bus Sardinia islanded power system was analysed in a scenario of a fully renewable independent power system. The lack of synchronous generators in the grid, due to the conventional power plants shutdowns, requires higher performances from RPPs in terms of synchronization and inertial response.

Can Sardinia become energy independent?

The Italian island of Sardinia was ripe for becoming energy independent as it doesn't have gas supplies. Energy companies love to fill a gap in the market so there have been attempts to build gas pipelines here, but all have failed so far.

Is Sardinia a green lab in the energy transition?

"We will be hiring people, rather than firing them." Sardinia (Italy) is a green lab in the energy transition: here a road map with the process of decarbonization and electrification, which will bring thousands of jobs.

How can Sardinia achieve a green and ecological transition?

A deep change to achieve the green, ecological, and inclusive transition of the Sardinia region by supporting the local economy and developing renewable energy production plants.

Do Sardinian villages have solar farms?

Whether it's demarcating land or creating their own energy, Sardinians don't wait on the authorities to do it for them. The solar farms in two Sardinian villages, Ussaramanna and Villanovaforru, feel like modern-day monuments to the power of perseverance.

Will Enel decarbonize Sardinia?

As Enel continues on its journey as Renewables Super Major, CEO Francesco Starace offers a road map for the decarbonization process in Sardinia (Italy) in which the decarbonization will skip the gas stage altogether. And, as part of a just transition that leaves no one behind, the electrification process will create thousands of new jobs.

Sardinia needs to add 6.2 gigawatts (GW) of green energy to the current 2.78 GW by 2030 to help Italy meet European Union targets to curb climate change. Italian power grid company Terna said it has received 804 requests in Sardinia for renewable connections to the grid, totalling some 54 GW. Only 0.4 GW have been granted. Todde's promise

Sardinia needs to add 6.2 gigawatts (GW) of green energy to the current 2.78 GW by 2030 to help Italy meet European Union targets to curb climate change. Italian power grid company Terna said it has received 804 requests in Sardinia for renewable connections to the grid, totalling some 54 GW. Only 0.4 GW have been granted. "Unsuitable"

Such is Sardinia's natural beauty that its "Costa Smeralda" or "Emerald Coast" is famous the world over, but perhaps green is a more appropriate color for describing the island's future, as it leads the way in the energy transition. According to Enel CEO Francesco Starace, Sardinia could occupy a unique position in the Mediterranean.

Pionniers dans les solutions solaires photovoltaïques, nous mettons toute notre énergie dans une vision d'avenir, que nous partageons avec nos clients particuliers, entreprises et collectivités, sur l'ensemble du territoire. Avec ...

From the point of view of solar radiation, the Sardinia region represents one of the regions with the areas with the highest energy efficiency coefficient for solar plants (1,400-1,500 KW/KWp). In 2021, the Group obtained authorization for the first project for an installed capacity of 45 MWp.

Sardinia (Italy) is a green lab in the energy transition: here a road map with the process of decarbonization and electrification, which will bring thousands of jobs. As Enel continues on its journey as Renewables Super Major, CEO Francesco Starace offers a road map for the decarbonization process in Sardinia (Italy) in which the ...

The island, with its abundant natural resources and strong winds, is emerging as a hotspot for renewable energy projects. However, the rapid influx of proposals for wind and solar farms has sparked concerns among residents and local authorities. The Renewable Energy Boom in ...

Market operators are now working to establish renewable energy communities (RECs) in Italy. Enel's coop is currently completing the feasibility study for the development of two RECs in Sardinia ...

Italian start-up Energy Dome has actually launched the first demonstrator project of its carbon dioxide-based energy storage space remedy, a 4MWh system in Sardinia, Italy, while also revealing Series B plans.

The Genesee Road Solar Energy Center, the Concord-Sardinia project's official name, isn't the only large solar farm recently proposed in Western New York: EDF also presented plans for a ...

The Genesee Road Solar Energy Center, the Concord-Sardinia project's official name, isn't the only large solar farm recently proposed in Western New York: EDF also presented plans for a 2,000-acre solar project in the Niagara County towns ...

Designed and built by Electro Power System and partner FZSoNick for Sardinia's water management agency, the hybridized microgrid integrates concentrating solar thermal and concentrating solar PV with thermal and intelligent battery-based energy storage. ... France's Electro Power Systems (EPS) yesterday announced commissioning of a novel ...

Cagliari: The bolts securing the towering wind turbine were unscrewed under cover of darkness, an act of sabotage symbolising a vehement pushback against renewable energy in Sardinia. Long summers and strong winds make the Italian island a prime location for wind and solar power, but intense investor interest has spooked locals who say Sardinia is ...

Renewable energy has been a hot topic in Sardinia, Italy's coal-fired island, sparking a local controversy over the landscape's transformation to produce energy for other parts of Italy. The pushback against renewable energy in Sardinia has been marked by acts of sabotage, such as unscrewing bolts on wind turbines under the cover of darkness.

The initiatives outlined in the State Energy Plan can be found here. The Genesee Road Solar and Storage Project is a proposed 250-megawatt (MW) photovoltaic (PV) solar energy generation facility, which may include approximately 20 MW of energy storage, in the Towns of Sardinia and Concord, Erie County, New York.
