

Why does France need more wind power?

Because France has set itself the ambitious target of reaching an installed offshore wind power capacity (bottom-fixed and floating) of 2.4 GW in 2023, about 5 GW in 2028 and 40 GW in 2050. Because technological progress has enabled the power of wind turbines to be increased.

How is wind energy generated in France?

Wind energy is generated from the conversion of kinetic energy from wind turbines into electricity. Wind power was one of the leading electricity sources in France, with over 50 terawatt-hours generated in 2023, placing France among the most important wind power producers in the European Union.

What is the public opinion on wind power in France?

The wind farm is to be situated in southern Brittany and will generate between 230 and 270 MW when operating at capacity. [47] Public opinion of wind power developments has remained quite popular among the French public. A 2021 Harris Interactive survey shows that 76% of the French public have a positive view of wind power. [48]

What is France's wind power development plan?

The wind power development plan sticks to the goals announced by the previous government, whose multi-year energy plan was hampered by a lack of an absolute majority in France's National Assembly. It was previously planned for 2023.

What is the French offshore wind power industry?

The French offshore wind power industry is made up of SMEs and major corporations. About 17% of them are pure players, while the others operate in the construction, energy, shipbuilding or logistics industries.

Why is Enbridge excited about the Saint-Nazaire offshore wind farm?

Enbridge is excited about the arrival of the first commercial-scale offshore wind project in France, the Saint-Nazaire Offshore Wind Farm, and about our role as a leader of the global energy transition. We're advancing several renewable energy projects in Europe and North America, and we are proud to have met this achievement ahead of schedule.

President Emmanuel Macron was set to unveil a plan on Thursday to boost renewable energy in France, including offshore wind farms and solar power, as the country is lagging behind most of its...
