Free energy solution Bolivia

How much energy does Bolivia use?
Total energy consumption in 2020 in Bolivia was of 43 kboe,of which shares were 24.2% for Diesel (DS),22.0% for NG,29.4% for gasoline and other fuels /Heavy Fuels (HF),12.4% for Biomass (BM) and 12% for electricity (EL) .

What percentage of Bolivia's electricity comes from renewables?
A quarterof the electricity generated in Bolivia comes from renewables. On the other hand,12% of the population still does not have access to electricity. The government has launched the Bolivia Electric Plan 2020-2025 to support the expansion of the el

How can Bolivia improve energy production?
Bolivia continues to make efforts to upgrade the infrastructure needed for renewable energy production. The National Interconnected System (SIN),which the government has put in place,aims to improve the nation's capacity for producing electricity by building additional power plants,transmission lines and substations.

Does Bolivia have a long-term energy plan?
As previously mentioned,the Bolivian government does not provide any long-term energy planning study,however,the UNFCC (2015b) states that RE will compose 81% of electricity generation by 2030. Bolivia's scenario for 2027 according to MHE (2009) states that biomass sources will comprise 8% of total final energy demand.

Should Bolivia use solar energy to generate synthetic fuels?
Using Bolivia's own excellent solar resources to generate synthetic fuels in BPS-1 and BPS-2 would result in energy independence and security. Due to the lack of GHG emission costs in BPS-3 fuel costs remain for the fossil fuels used in the heat and transport sectors. Fig. 23.

Will Electric based heating drive the transition in Bolivia?
Heating demand in Bolivia transitions from a system dominated by natural gas and biomass to a largely electrified heating sector. Because of the low cost of renewable electricity,electric based heating will drive the transitionfor Bolivia's heat sector. Fig. 13.

o Reduces 2050 all -purpose, end-use energy requirements by 70.7%; o Reduces Bolivia"s 2050 annual energy costs by 67.9% (from $13.5 to $4.3 bil./y); o Reduces annual energy, health, ...

Germany"s MAN Energy Solutions has delivered ten of its 20V35/44G gas engines with a combined capacity of over 100 MW to power a steel mill in Bolivia. The engines will supply electricity for the El Mutún iron ore ...

So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.
