

# French Guiana power station 220v output

What is the voltage in French Guiana?

Just like in the rest of France, the voltage in French Guiana is 230 volts and the frequency is 50 Hz. Click [here](#) for a global map showing the spread of the different plug types used around the world. Click [here](#) for a detailed list of the countries of the world with their respective plug and outlet types, voltage and frequency.

Is biomass a source of electricity in French Guiana?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Guiana: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What type of plug is used in French Guiana?

In French Guiana, types C and E are the official standards. Just like the rest of France, all French overseas departments have standardized on the same plug, outlets, voltage and frequency. Since type F plugs are identical to type E plugs, they can also be used with type E sockets. What is the mains voltage in French Guiana?

How does ceog fit with French Guiana's energy strategy?

The population of French Guiana is very quickly increasing. Guiana has to face a considerable energy deficit, especially in the west where the demographic growth is booming. By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy.

How much daylight does French Guiana have?

French Guiana is situated in northern South America, close to the equator. It, therefore, boasts 12 hours of daylight throughout the year, which will allow the CEOG solar-cum-green hydrogen power project to operate consistently as a baseload facility all year round.
