Selling: Three days per time of follow-up services, video inspection. After sales: Engineer can be on-site installation service. ...

Since we have 24V batteries, we also want 24V solar panels. The amp output of a 24V 250-watt solar panel will be 10.4A. This is under ideal conditions, as variation in sunlight will affect the power output, and the amp output, of our solar panels. When wiring solar panels, you can choose to wire either in series or parallel.

Grid-tied solar systems. Grid-tied systems are solar panel installations that are connected to the utility power grid. With a grid-connected system, a home can use the solar energy produced by its solar panels and electricity that comes from the utility grid.. If the solar panels generate more electricity than a home needs, the excess is sent to the grid.
