

With machines, materials and service under one roof, Fres-co's unique system approach provides seamlessly integrated and cost-efficient flexible solutions. Learn More About Fres-co. NEXTPAK(TM) Sustainable Flexible Packaging Offerings. Including Recycle-Ready, Post Consumer Recycled, and Source Reduced Materials ...

Increasing solar energy installations, owing to the projects announced in the LTAs during 2015-2018, increasing demand for decentralized solar energy systems, and the ambitious renewable energy targets are expected to drive the solar ...

The Mitre Calera Solar Park, located in Zacatecas, is a photovoltaic solar energy project with an installed capacity of 80.3 MW. It is estimated to produce 234,449.00 MWh annually, which is sufficient to supply approximately 23,000 homes each year. This solar farm spans an area of 258.57 hectares, equivalent to about 40 Azteca stadiums.

Mexico City, Mexico (latitude 19.4326, longitude -99.1332) is an excellent location for solar power generation due to its consistent sunlight throughout the year and its proximity to the tropics. In this region, you can expect an average daily energy production of 5.68 kWh per kW of installed solar capacity during summer, 5.51 kWh in autumn, 5.94 kWh in winter, and a notably higher output ...

FRES is a pioneer in solar energy, with a 20-year track record of installing and servicing solar energy installations in rural Africa. From a single company South Africa in 1999 that recently became self-reliant, we have replicated and further developed our model in Mali, Burkina Faso, Uganda and Guiné-Bissau.
