

Full process of photovoltaic panel installation

How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. A solar panel will be most effective if you have a south-facing roof.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

What is the installation phase of a photovoltaic system?

The installation phase of photovoltaic (PV) systems is a critical step that involves several key activities to ensure the system operates effectively and safely. Here's a more detailed look at what this phase entails:
