Why is Burkina Faso launching a solar power plant in Komsilga?

Loading... In a significant step towards enhancing electricity supply and sustainable development, Burkina Faso signs an agreement for a 50 MWp solar power plant in Komsilga. The initiative, led by the Minister of Energy and Energie Plus, aims to fortify renewable energy contributions, fostering economic growth and improved access to electricity.

Will Burkina Faso build a nuclear power plant?

Burkina Faso's military leaders have signed a deal with Russia to build a nuclear power plant to increase electricity supplies. It is the junta's latest move to align itself with Russia after falling out with most of its Western partners. The junta has turned to Russia for economic and military support since it seized power last year.

How does Burkina Faso get its electricity?

The deal is part of Burkina Faso's target to achieve 95% electricity access for urban areas and 50% for rural areas by 2030. Burkina Faso gets most of its electricity from biofuels like charcoal and wood while oil products account for one-third of the total energy supply, according to the International Energy Agency.

Does Burkina Faso have an electricity market in 2022?

No data for Burkina Faso for 2022. Unlike other energy commodities such as coal, oil and natural gas, electricity trade between countries is relatively limited as it is more technically complex and requires a direct cross-border interconnection.

Will a 50 MWp solar power plant bolster Burkina Faso's electricity supply strategy?

In a pivotal move to bolster Burkina Faso's electricity supply strategy, the Minister of Energy, Mines, and Quarries, Simon-Pierre BOUSSIM, and Serge CONSEIGA, General Director of Energie Plus, sealed an agreement for the construction of a 50-megawatt peak (50 MWp) solar power plant in the commune of Komsilga, Burkina Faso.

How long does a power outage last in Burkina Faso?

The average power outage time was 233 hours in 2018, compared with 172 hours in 2017. In addition, the cost of energy remains high for households and businesses, at XOF 75 per KWh of high-voltage electricity in 2019. No on-grid IPPs operating in Burkina Faso
