Genexus grid conditions North Korea

What is a grid control in Genexus?

The Grid control displays data associated with many records. In some cases,it also allows entering,updating,and deleting data. You can include a Grid control in GeneXus objects with UI (User Interface/screen). The Grid control has different capabilities depending on the object in which it is located. It is important to understand them.

What is a condition property in Genexus?

This property applies to the individual control for which it is defined. It must not be confused with the Conditions tab of the GeneXus object (whose aim is to apply filters to the whole object: form, all the Grids, etc.). This property applies only at design time. Consider a Knowledge Base containing the following Transaction object s:

Does Genexus automatically load a grid?

Yes: Grids load automatically. This is the default value. GeneXus performs an automatic pagination if the Rows property of the grid has a value other than zero. The buttons inserted depend on the number of records to be shown and the number of lines of the grid.

What is a condition attribute in Genexus?

Attributes must belong to the Extended Table of the Base Table where the condition is applied. This property applies to the individual control for which it is defined. It must not be confused with the Conditions tab of the GeneXus object (whose aim is to apply filters to the whole object: form, all the Grids, etc.).

How do I add a grid in Genexus?

There are different ways to add a Grid: Drag the Grid icon from the Toolbox to the desired location on the Web Layout of the Web Panel /Layout of the Panel. Select Insert > Gridfrom the GeneXus main menu. Next,a Selector window will be opened to select which attributes/variables you want to include in the Grid.

When did North Korea start a power grid?

From 1961to 1967,North Korea focused on large-scale hydro and thermal plants to electrify its rail transport systems and pushed the power grid into every "ri" (village) in the country. But things started to falter.

Obtains or sets the number of records of a Grid or Freestyle Grid. Scope. Objects: Web Panel Generators: , Framework, Java Controls: Free Style Grid, Grid. Description. The RecordCount property returns the number of records of the Grid that meet the selection conditions. It may return -1 if the program could not determine it (it was not ...

When GeneXus can automatically determine a table to be browsed in order to load the grid lines, it does so, and in that case you won"t need to provide that information. That"s why we say there is an "implicit" For each. ... There"s a property called "Conditions" in the window containing the Grid control properties. By clicking on the combo, an ...

When you have a two-level Transaction in GeneXus, you are saying that the data in that transaction must be managed as a whole. That"s why GeneXus won"t let you remove the second level"s grid from the Form. What you need to do, if you want to manage the two levels separately, is to have two different transactions, one for each level.
