Why should you choose Eaton?

As the energy transition evolves globally, Eaton remains committed to helping customers safely add more renewables, energy storage, and electric vehicle infrastructure to their energy mix - to become more sustainable and resilient while lowering energy costs.

What does Eaton do?

Eaton's mission is to improve the quality of life and the environment through the use of power management technologies and services. We provide sustainable solutions that help our customers effectively manage electrical, hydraulic and mechanical power - more safely, more efficiently and more reliably.

How much money does Eaton make a year?

Eaton's 2019 revenues were \$21.4 billion, and we sell products to customers in more than 175 countries. With our energy storage systems, homes and businesses gain access to a safe, reliable and efficient power management that harnesses the full potential of renewable sources.

A BESS can store and supplement power needs to keep utility loads relatively uniform based on utility supply and end-user demand. The xStorage BESS optimizes energy usage and enables energy transition with support for energy storage, EV integration and grid modernization.

To rid the use of fossil fuels and meet its decarbonizing energy goals, Georgia Power is adding Battery Energy Storage Systems (BESS) to its clean energy portfolio. BESS creates more flexibility with energy usage from demand fluctuations and adds more capacity to the energy system.

Georgia Power has received approval from the Georgia Public Service Commission (PSC) to build, own, and operate a new battery energy storage system. Known as the Mossy Branch Battery Facility, the grid-charging battery system is located on 2.5-acres in Talbot County, near Columbus, Georgia.

4 ???&#0183; Battery energy storage system (BESS) is an energy storage solution that allows facilities to store power and use it on demand. Learn more about a BESS and how it can be used for peak shaving and DC fast charging.

Intelligent power management company Eaton announced the xStorage(TM) battery energy storage system (BESS) to accelerate decarbonization projects and maximize the impact of onsite renewables.

5 ???&#0183; Eaton's xStorage containerized BESS enables utilities, commercial and industrial facilities to store energy so that it can be used on demand, as a back up power source, or to participate in demand response programs selling energy back to the grid.

## Georgia eaton bess

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC) on Thursday to mark commercial operation of the company's first "grid-connected" battery ...

To rid the use of fossil fuels and meet its decarbonizing energy goals, Georgia Power is adding Battery Energy Storage Systems (BESS) to its clean energy portfolio. BESS creates more flexibility with energy usage from ...

Eaton, a US-based power management company, has launched a new BESS for commercial and industrial use. The xStorage system offers a usable energy capacity ranging from 250 kWh to 1,000 kWh.

The xStorage battery energy storage system (BESS) offers 250 to 1000 kWh of stored energy, providing eco-friendly backup power during outages and optimizes solar energy consumption, while also managing peak demands to reduce utility costs.
