Fronius through the local web interface reachable from the inverter's LAN IP provides the Battery Management utility -> Time-dependent battery control. Indeed, it is possible to charge at night, but the process is static.

Integrated Multi Flow Technology allows Fronius inverters to charge and discharge the storage unit even in a backup power situation, meaning that even longer grid failures can be covered. Batteries can also be retrofitted in Fronius systems and expanded at any time, so you can offer your customers maximum flexibility and future-proofing.
