

What is Georgia's energy policy?

Georgia's energy-policy aim is to raise the country's energy security, guaranteeing an uninterrupted supply of various energy products of acceptable quantity, quality and price to support national interests.

What is Georgia's new law on energy and water supply?

The new Law on Energy and Water Supply, approved by Georgia's parliament in 2019, was developed in co-operation with the Energy Community to transpose the requirements of key electricity and gas directives into Georgian legislation.

What is Georgia's final energy consumption?

Georgia's final energy consumption was 4.49 Mtoe in 2020. From 2000 to 2020, both final energy demand and electricity consumption per capita more than doubled, and are very close to global averages. The final energy mix is relatively diverse compared with other countries in the region.

Is solar energy available in Georgia?

Solar energy in Georgia is widely available, due to high average insolation. In 2021, Georgia contracted Abu Dhabi's Masdar to develop a 100-megawatt solar power project in a move to diversify the country's energy mix. The government is on a mission to reduce greenhouse gases by this new implementation of alternative energy.

Does Georgia have a good energy sector?

Gross domestic product (GDP) per capita (in current prices) increased from USD 920 in 2003 to USD 5 015 in 2021. 1 Georgia has developed a stable and reliable energy sector that has been largely unbundled since the mid-1990s; its primary domestic energy sources are hydropower and fuelwood.

Does Georgia have a strategy for energy supply disruptions?

The Law on the State of Emergency (2005) defines and regulates emergency response, but Georgia has no declared strategy for emergency stockholding or fuel switching mechanisms for energy supply disruptions. The government estimates that Georgia's minimum strategic reserve for gas should be 120 mcm and is considering various storage options.

Georgia is both a top five nuclear power producing state, and a top ten solar energy generating state. While we do rely on fossil fuels as a reliable source of energy, our capacity for renewable energy is expanding, and we anticipate ...

Georgia has implemented energy efficiency legislation to transpose the Energy Community acquis on energy efficiency. The Law on Energy Efficiency, prepared according to EU Energy Efficiency Directive 2012/27/EU, aims to: Establish a ...
