The cost of solar power in Georgia varies depending on the home size, solar panel type, and where in the state you are located. The state average cost to install solar panels is \$16,020 to \$19,740, with most residents paying \$17,880 for a 6 kW system using monocrystalline panels mounted on the roof.

Facts. You'd think Georgia would make it legal to put solar panels up without HOA's being able to block but nope... HOA's have so much power to deny homeowners the right to put up solar. If your HOA thinks the panels aren't in good taste or don't go with the flow of your neighborhood, best of luck to you.

Rooftop Solar. Solar energy systems are wired behind a customer's meter when they are planning to offset their energy usage from the grid. Our goal is to provide you with information to help you make an informed decision on whether or not solar is a good option for your home and the next steps if you would like to move forward with a solar installation.

Federal solar tax credit has been around for some time, and it allows you to claim a percentage of your solar panel installation costs as a tax credit. Until very recently, the credit equaled 26%, and it was set to expire in 2024. However, thanks to the passing of the Inflation Reduction Act of 2022, the credit was extended and increased to 30%, which will last until 2032.

How to get free solar panels in Georgia? Look no more, we covered everything in our guide on going solar in Georgia! December 14, 2023 The allure of "free" solar panels often catches the eye like a ray of Georgia ...

According to the Solar Energy Industries Association, the cost of a residential solar panel system has decreased by more than 60% on an annual basis over the last decade, falling from more than \$50,000 for a 6-kilowatt-hour (KWh) system in 2011 to between \$16,000 and \$21,000 in 2021..
