Will Europe rely on China to make battery production Green?

BRUSSELS, Nov 28 (Reuters) - France, Germany and Sweden called on the incoming European Commission on Thursday to ensure the future of battery production in Europe and avoid relying on China to meet its needs for the green transition.

Will Chinese companies be able to develop batteries in Europe?

New criteria requiring Chinese businesses to have factories in Europe and share technological knowhow will be introduced when Brussels invites bids for EUR1bn of grants to develop batteries in December, according to two senior EU officials. The pilot could be rolled out to other EU subsidy schemes, they said.

Could a German car be powered by a battery?

But Germany is also investing large amounts in battery technology. Production is being ramped up at pace, and in a few years one in four electric cars produced in Europe could be powered by a battery from a German factory. In 2022, 46% of Germany's gross energy generation came from solar, wind and hydro power.

Why did SVOLT stop making EV batteries in Europe?

SVOLT supplies batteries for the Citroën e-C3 and reportedly had a contract with BMW as well. Chinese EV battery maker SVOLT has announced it will shutter its European operations in January and abandon plans for two production facilities, blaming slumping sales across Europe and rising trade tensions for the abrupt pullout.

Why did SVOLT abandon plans for two German battery plants?

SVOLT is abandoning plans for two German battery plants, citing weak European sales and economic challenges. The company is the eighth-largest battery manufacturer in China, holding a 2.36% share of the market. SVOLT supplies batteries for the Citroën e-C3 and reportedly had a contract with BMW as well.

Is a lack of domestic battery manufacturing threatening Europe's automotive industry?

"The failure to establish domestic battery manufacturing capabilities threatens the very existence of the automotive industry in Europe," said Andy Palmer, former chief executive officer of Aston Martin Global Lagonda Holdings Plc.

A team of scientists working for Bonn-based company High Performance Battery (HPB), led by Prof. Dr. G nt r Hambitzer, has achieved a decisive breakthrough in battery and storage technology with the development of the world's first solid-state battery with outstanding properties to production readiness.

Buy CHINS Bluetooth LiFePO4 Battery Smart 12.8V 100AH Lithium Battery Perfect for Trolling Motors, Golf Cart, Marine, RV, Solar, Boat, Built-in 100A BMS, 2000+ Cycles: Battery Chargers - Amazon FREE
