Hitachi Energy supports huge step in Germany's energy transition HVDC Light &#174; transmission system will transfer vast amounts of renewable energy for up to 5 million households and help ...

One HVDC converter station is situated near Tonstad in southern Norway and the other near Wilster in

northern Germany. Hitachi Energy was awarded the project in 2015 by a consortium comprising Statnett, Norway's state-run electricity transmission and distribution utility; the state-run electricity transmission operator TenneT in the ...

Hitachi Energy, a global technology leader that is advancing a sustainable energy future for all, today announced it has won a major order from TenneT and TransnetBW, two of Germany's four transmission system operators, to supply a transmission solution for the SuedLink DC4 high-voltage direct current interconnection between the north and south of the country.

In an initial installation at TransnetBW in Germany, which supplies power to 11 million people and numerous industries, Grid-enSure will improve power quality in the transmission grid, by contributing to the grid inertia level by almost 2 GWs and decrease CO2 emissions by up to 40% over a 30-year lifetime compared to traditional alternatives.
