Can I lease my land to a solar panel developer?

Yes, you can lease your land to a solar panel developer or a municipality that buys solar panels and make some extra income on the side.

How do I lease solar panels?

You can also lease the land to a company, university, or municipality that purchases the solar panels outright. Or you can lease your land to a solar developer like Verogy, who owns the solar panels and sells the energy to a company, university, or municipality through a power purchase agreement (PPA).

How do I choose a solar panel farm?

First, take a look at your land. If it's a flat, open space that's 20 to 25 acres, your land is a good candidate for an average-sized solar panel farm. You should also know that once a solar developer installs the solar panels, they'll have very little impact on the physical state of your land.

Should you Lease Your Land to a solar farm?

In fact, it's one of the most popular options out there today because solar panel companies will come and look at your land and then offer you an estimate for the amount of money you can make by leasing your land to them. However, you should research while leasing your land to a solar farm because several factors come into play.

How much money can you make leasing land for a solar farm?

Most landowners ask this question, and it is a genuine query that should be asked before you end up leasing your land to a solar developer. The short answer is that you can make somewhere between \$300 to \$2,200 per acre every year by leasing your land for a solar farm.

Can I lease a solar acreage?

Since most solar leases are paid on a per acre per year basis, the larger your parcel is, the more you could make when you lease your land to a solar developer. Not all of your acreage may be suitable for solar panels. Exclusion zones can be thought of as land that solar equipment cannot be placed on for one reason or another.
