

What was the energy supply in Ghana in 2000?

In comparison, the total energy supply in 2000 was about 6,255 ktoe (Table 2.1). Biomass constituted the largest share of the country's total energy supply from 2000 to 2011, though oil has become the dominant fuel and an integral part of the Ghanaian economy in the last eight (8) years as illustrated in Fig 2.1.

Is Ghana a good place to get electricity?

Thanks to strong government leadership since the 1990s, Ghana had an electricity access rate of 84% in 2018, one of the highest in sub-Saharan Africa. To reach the remaining population, grid densification (58% of the new connections) and stand-alone systems (27%) are the two main least-cost solutions in both scenarios. IEA. Licence: CC BY 4.0

Can a solar power plant be profitable in Ghana?

Other sites with much bigger potential can be profitable if only they are developed as hybrid schemes or for multi-purpose (water supply, irrigation, transportation) use. Ghana is well endowed with solar energy resources, which could be exploited for electricity generation and thermal applications such as water heating and crop drying.

Which is the largest electricity provider in Ghana?

ECG remains the largest service provider of electricity in Ghana with about 80.1% of the total customer in 2020, whereas NEDCo and EPC had 19.9% and 0.003%, respectively of the total customer population.

How much energy is needed in Ghana?

Around \$70 billion of cumulative energy supply investment is needed in the STEPS, 60% of which is for upstream oil and gas. Investment ramps up by nearly 45% in the AC, with a strong emphasis on renewables and electricity networks. Thanks to notable efforts on electrification, the goal of full access is within grasp in Ghana.
