

# Ghana staples energy

What type of energy does Ghana use?

Ghana primarily uses natural gas for thermal power generation, but occasionally uses light crude oil and diesel. Ghana exports power to Togo, Benin, and Burkina Faso. The Government of Ghana remains heavily involved in the energy sector, with state entities having a controlling presence in the entire value chain.

How much energy is needed in Ghana?

Around \$70 billion of cumulative energy supply investment is needed in the STEPS, 60% of which is for upstream oil and gas. Investment ramps up by nearly 45% in the AC, with a strong emphasis on renewables and electricity networks. Thanks to notable efforts on electrification, the goal of full access is within grasp in Ghana.

Can Ghana decarbonise the energy sector?

By Edward Acquah Accra, May 27, GNA- As the world races to transition from fossil fuel to renewable energy, Ghana has developed a National Energy Transition Framework (2022-2070) to decarbonise the energy sector to help achieve net zero targets as part of commitments under the Paris Agreement.

Why is the energy sector a problem for Ghana?

Long delays in payments by the government are a significant concern in Ghana's energy sector, as the subsidy comes from the national budget. Debt within the energy sector and the high cost of power in Ghana create a brake on Ghana's economic development.

What is Ghana's Energy Transition Plan?

Solar and biomass contributed one per cent each to the energy mix. Currently, about 70 per cent of Ghana's generation installed capacity of 5,321 MW is from a thermal plant that uses natural gas as its primary fuel. Scope of framework Ghana's energy transition plan identifies energy and transportation sectors as key areas in reducing emissions.

Will natural gas be part of Ghana's energy mix in 2022?

Speaking at the 2022 Ghana International Petroleum Conference (GhIPCon) in Accra in September 2022, Vice President Dr Mahumudu Bawumia said natural gas would continue to be part of Ghana's energy mix in the short term as the country takes steps to fully transition from fossil fuels to renewable energy by 2070.
