Bill Vietas leads Gibraltar's renewable energy group and more than 10 years' experience in the renewable energy industry. He was appointed President of the Renewable Energy and Conservation Group in January of 2018. Before that, he was General Manager of RBI Solar, helping to start the company in 2009.

We are pursuing the fastest, most practical path to bringing fusion energy to market using Magnetized Target Fusion (MTF) technology. Today's economic, social, and political trends increase the demand for fusion energy. We're on track to deliver zero-carbon energy to the grid by the early to mid-2030s with our proprietary technology.

The Energy Efficiency Directive (EED) came into force in 2012 and is the most comprehensive directive on energy efficiency. The EED establishes a common framework of measures for improving energy efficiency throughout the European Union (EU) Member States and to ensure that the EU achieves its energy saving target of 20% by 2020.

4. The European Commission's Energy Winter Package. There is also change in the private sector, with new partnerships to deliver the enabling infrastructure and company reorganisations to develop new business models. The adoption rate of these grid edge technologies is following the typical S-curve seen in other new technological adoptions.

Solarcentury Africa, His Majesty's Government of Gibraltar and the Gibraltar Electricity Authority have entered into a build, own, operate and transfer agreement for a 14 MWh (AC) battery energy storage system to be located next to the North Mole Power Station in Gibraltar.
