

Gibraltar eternal energy

Why does Gibraltar need a new power plant?

This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

Does Gibraltar have electricity?

Until recently, Gibraltar's electricity supply was dependent on some 40 diesel-powered engines and turbines distributed across Gibraltar. In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG).

Why does Gibraltar need a LNG power system?

The people and businesses of Gibraltar will have better air quality, a quieter environment, and see the rewards of better energy efficiency. Michael Caetano, Chief Operational Officer of the Gibraltar Electricity Authority (GEA) When Gibraltar upgraded its nearly 40-year-old power system, they opted for a unique LNG solution.

Is Gibraltar switching from diesel to natural gas?

Gibraltar today saw the official opening of a liquefied natural gas (LNG) regasification terminal that was recently completed by Shell and Gasnor (a 100% Shell-owned subsidiary). As a result, Gibraltar is switching from diesel-fuelled power generation to cleaner-burning natural gas, using a newly commissioned 80-megawatt gas-fired power plant.

Does Gibraltar need a cleaner liquefied natural gas (LNG)?

Until recently, Gibraltar's energy needs were 100% powered by marine diesel - so, a better solution was urgently needed - one that switches from diesel to cleaner liquefied natural gas (LNG).

How many power stations are there in Gibraltar?

There are currently three installations in Gibraltar producing energy. Two of these installations namely Waterport and OESCO power stations supply electricity to the civil population,...

Eternal Energy is our current exciting term for covering new source(s) for more efficient energy to save us from running out of easy to get at, affordable, safe energy by the end of this century. Even though there is "no such thing as eternal energy... even the Sun is not eternal," the new small nuclear plants come pretty close. ...
