Solar panels can range in their energy output from roughly 75 watts to 350 watts, with an average output of about 250 watts. When solar panels are grouped together, they form a solar panel system. The energy potential of the system is calculated by the number of panels multiplied by their power output.

KTPress takes a look at how the uptake of solar energy (Off-grid) and how it has impacted the lives of Rwandans who are not connected to the National grid as the country eyes attaining the 100% electricity for all by ...
