

How many power stations are there in Gibraltar?

There are currently three installations in Gibraltar producing energy. Two of these installations namely Waterport and OESCO power stations supply electricity to the civil population,...

How many gas engines work in Gibraltar?

MAN gas engines on Gibraltar produce high-efficiency electricity and reduce the emission of NOx, particulate matter and CO2 during gas operation. MAN's new 51/60 Gas and 51/60DF engines will replace existing diesel engine power plants and improve ambient air quality.

Does Gibraltar have thermal energy production?

There is no provision for thermal energy production. The construction of the power plant essentially comprises the following components: An administration building with security fencing, gates, guard house, on-site roads and parking areas will be built for the Gibraltar Electricity Authority.

Does Gibraltar have electricity?

Until recently, Gibraltar's electricity supply was dependent on some 40 diesel-powered engines and turbines distributed across Gibraltar. In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG).

Is Gibraltar a sustainable country?

At present, Gibraltar is very dependent on the importation of fossil fuels for energy production and in order to reach the 2020 targets, strategies and measures based on sustainability, improved efficiency and security need to be implemented. Guidance documents are also available to aid in the implementation of Articles within the EED.

How will Brexit affect Gibraltar?

Around the base of the Rock of Gibraltar is a bustling hub of commerce whose energy demands are projected to rise dramatically in the next decade. Regardless of whether Brexit further reinforces the border that already separates the peninsula from the Spanish mainland, its community requires superior, more efficient power generation.
