

Does Trinidad and Tobago have fossil fuel resources?

Trinidad and Tobago has abundant local fossil fuel resources, but is taking steps to prepare the societal, legal, regulatory, and economic foundations necessary to support renewable energy and energy efficiency technologies.

Who owns the energy in Trinidad & Tobago?

In 1994, it divested from its generation holdings on the larger island of Trinidad and now purchases energy from three Independent Power Producers (IPPs): the Power Generation Company of Trinidad and Tobago, which purchased the former T&TEC-operated plants and presently controls 1,386 megawatts (MW) of gas-fired capacity across

How much does electricity cost in Trinidad & Tobago?

Trinidad and Tobago's electricity rates are some of the lowest in the Caribbean at approximately \$0.04 per kilowatt-hour (kWh), well below the regional average of \$0.33/kWh. Unlike many island nations, Trinidad and Tobago has significant oil and natural gas reserves and is a net exporter of these fuels.

Does Trinidad & Tobago need energy subsidies?

Unlike many island nations, Trinidad and Tobago has significant oil and natural gas reserves and is a net exporter of these fuels. However, subsidies for domestic energy consumption have created a fiscal burden on the government that could be reduced through the expansion of alternative transportation fuels, energy efficiency, and renewable energy.

Divert gas from domestic electricity generation through energy efficiency and renewable energy. In Trinidad & Tobago, almost 100% of electricity is generated using natural gas. Because natural gas is in such short supply at the moment (compared to demand), the national priority must be to use the gas in activities which generate the most amount ...
