

Go out to work installing photovoltaic panels

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How long does it take to install solar panels?

The installer will then install the solar panels to the racking and connect the electrical wiring. They'll also install any additional equipment, such as an inverter or battery bank. Many solar installers can complete installation in just one day. More complicated installations can take three or more days.

Should you install solar panels on a roof?

A solar installer puts panels on a roof. Going solar to save some money could be a good decision for a lot of people. Installing solar yourself to save a bit more, however, probably isn't a great idea. Solar panels already cost a decent chunk of change, and screwing up an installation will cost you valuable time and money.

Do I need an electrician to install solar panels?

You'll still need professional assistance, including a licensed electrician, to properly install your panels. We recommend using a certified solar installation company to ensure a safe and proper installation. For a visual walk-through of what goes into installing solar panels, check out the video below.

How do I choose the best location to install solar panels?

You need to assess your property to determine the best location to install your solar panels. Consider factors such as shading, orientation, and roof or ground space. Look for areas that receive maximum sunlight throughout the day, and ensure that there are no obstructions that may shade your solar panels.

How do I get a great deal on solar panels?

The best way to get a great deal on your solar panel system is to compare quotes based on cost, equipment, and installer reputation. Historically, many solar shoppers only received one solar quote from a door-to-door salesperson or a cold call. But how can you feel confident in your solar decision if you only see one quote?

In most cases, yes, you can install solar panels on your home if it is governed by an HOA, though you will likely have to submit a request. Many states and territories have enacted solar access laws, which prevent HOAs from ...
