Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

Why are solar panels so expensive in Greece?

Global demand, industrial accidents, environmental disasters, exchange rates and the impact of the coronavirus pandemic could all be contributing to a rapid rise in the cost of solar power panels in Greece since the beginning of July. Industry sources reported price hikes of up to 25%.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

Why are solar prices rising in Greece?

Industry sources reported price hikes of up to 25%. Investors in solar power in Greece are concerned because of a sharp rise in prices for the equipment in the past two months, reversing the declining trend in the cost of photovoltaic technology registered over the past years, according to a local media report.
