

Is Luxembourg ready for a green energy transition?

Renewable energies are constantly on the rise, steadily gaining ground on the path to energy transition. Luxembourg is on the right track to reach its objective with its green energy development support project, 'Gréng relance fir Lëtzebuerg'.

Can Luxembourg create a smart energy and transport network?

But Luxembourg has the possibility to do something no IEA country has done, which is to combine smart grids and electric vehicles at country-wide level to create a smart energy and transport network," said IEA Executive Director Maria van der Hoeven as she presented the report.

Is Luxembourg ready for a green economy?

With the highest per capita income in the OECD, Luxembourg is well-placed to continue its development towards an innovative and green economy. Among its key recommendations, the IEA report calls for Luxembourg to:

Should Luxembourg join the International hydrogen network?

Regarding hydrogen, Luxembourg must join the international hydrogen network, particularly to decarbonise heavy industry. Additionally, there is confirmation of the ambitious national indicative target for improving energy efficiency. Luxembourg confirmed this target at -42% (compared to REF2007), equivalent to 36,949 GWh of final energy in 2030.

Sources: Luxembourg's draft National Energy & Climate Plan, Eurostat (PEC2020-2030, FEC2020-2030 indicators and renewable SHARES), COM(2018)716 final (2017 GHG estimates) The draft National Energy and Climate Plan (NECP) has been drafted in accordance with the new coalition agreement 2018-2023 with the objective of doing the utmost to comply ...

Luxembourg had 5 % renewable energy in 2015, while the target is 11 % in 2020. The national agency for innovation and research has established the EcoInnovation Cluster, which supports green technologies and renewable energy. Under the Horizon 2020 energy programme, Luxembourg participants have received EUR2.6 million of EU funding.
