

In Equatorial Guinea, where 82-year-old President Teodoro Obiang Nguema Mbasogo has ruled since seizing power in a coup in 1979 and is grooming his favourite son to succeed him, Russian security ...

But stored energy can help match renewable power to demand and allow coal and gas plants to be retired. Reservoirs for green electricity. Electricity can be stored by using it to pump water from a low-lying reservoir into a higher one. When power is needed, the water flows back down and spins a turbine--often the pump, spinning in reverse.
