

Can Nepal provide green energy to South Asia?

Nepal could play a crucial role in providing green energy to South Asia by reducing the output of black carbon that accelerates climate change and pollutes the majestic Himalayas. But how can we ensure Nepal's energy production is in harmony with nature and local communities? FMO's 'Environmental and Social' sector initiative is a good start.

Will Green Hydrogen meet the feedstock requirement to produce urea in Nepal?

To meet this demand, the annual green hydrogen demand is around 82,475 tons, and this demand is exceeded by the hydrogen produced which utilizes 40% surplus energy by the year 2025. This implies that the green hydrogen has the potential to meet the feedstock requirement to produce Urea in Nepal.

Can Nepal produce hydrogen from existing hydropower plants?

A study done in 2008 projected that Nepal has the potential to produce hydrogen from existing hydropower plants during the off-peak load by utilizing surplus electricity. The possibility of utilizing produced hydrogen energy to replace the existing fossil fuels was also done in the study.

Can Nepal produce hydrogen from surplus electricity?

To generate value from the future surplus electricity, there is a need to initiate the study related to hydrogen production potential in Nepal and in end uses. A study done in 2008 projected that Nepal has the potential to produce hydrogen from existing hydropower plants during the off-peak load by utilizing surplus electricity.

Is Nepal a good place to invest in green energy?

Nepal - the landlocked Himalayan country, sandwiched between Asia's two most populous nations, India and China - has the potential to hold a key position on the subcontinent when it comes to green energy. Its rivers that sprout from the highest mountains in the world, offer a vast potential for hydropower in the region of 40,000 megawatt.

Could Nepal be a solar power hub?

The Himalayan region is also known for high solar radiation, providing a huge capacity for potential solar power development. "Nepal could potentially provide North India, Bangladesh and parts of China with green energy," Silvanus says. And at the same time, address chronic poverty levels in Nepal, one of the world's least developed countries.

With the adoption of the Nepal Green Hydrogen Policy-2024, the country has set a more tangible framework for future study, innovation and funding of green hydrogen. This policy lays the groundwork for realizing Nepal's immense opportunity in green hydrogen generation, mainly based on Nepal's hydropower potential.

For years, Green Power has campaigned for the Producer Responsibility Scheme on drinks containers - and

the public has also longed for such scheme. In 2017, the HKSAR government commissioned a consultancy study on the topic. After a long wait of five years, the public consultation on Producer Responsibility Scheme (PRS) on Plastic Beverage ...
