

Greenland plico battery

Are all plico solar systems grid-connected?

All Plico solar systems are grid-connected. While you may be dismayed at seeing energy get imported from the grid, it is a necessary and important part of the system's operation. The amount of grid energy you use compared to the solar energy you use for your home depends on a number of factors.

Does plico offer a solar inverter & battery system?

Chat with us about our complete system of solar panels, inverter and battery for your home. All for just one low, weekly instalment. There are solar panels, and then there's the Plico solution. Our solar battery and inverter systems power your home when the sun's shining - and when it's not.

How long does a plico battery last?

Plico provides service and maintenance on all of its battery systems, so you have peace of mind that a Plico battery will work as intended by the manufacturer over the 10-year contract period. Plico members can upgrade their battery at the end of the 10 years and continue enjoying 24/7 solar savings with a new battery!

What time does plico send power to the grid?

Plico said more than half of its VPP's power storage capacity was dispatched between 5 p.m. and 7 p.m. on the day to support the grid. This included more than 3 MW in power exported directly to the grid.

How much DoD does a plico battery have?

Plico batteries have a DoD between 90% - 95%. An additional 5%-10% is included for blackout protection and to preserve the life of the battery. Setting your battery to its maximum DoD runs the risk of the battery drawing beyond this limit and shutting down for a short time.

Why should you choose plico solar panels?

At Plico, solar panels are only part of the solution. We've introduced cutting-edge solar battery inverter technology - so you can now power your home day and night from stored energy, save money, be protected against blackouts and contribute to the wider community. Learn More At Plico, we're not afraid to disrupt the energy market.
