How much does energy cost in Guadeloupe?

Energy Snapshot Guadeloupe This profile provides a snapshot of the energy landscape of Guadeloupe,an overseas region of France located in the eastern Caribbean Sea. Guadeloupe's utility rates are approximately \$0.18 U.S. dollars (USD) per kilowatt-hour (kWh),below the Caribbean regional average of \$0.33 USD/kWh.

Where can I find information about Guadeloupe energy?

Welcome to the website of Guadeloupe Energie! On this website, you'll find information on Guadeloupe's progress on energy transition from energy legislation to industry data, from profiles for renewable energy in Guadeloupe to the latest news and events--all in one place.

How can Guadeloupe achieve energy independence?

"Achieving energy independence in Guadeloupe byshifting from fossil fuels to renewable energy sourcesis a challenge that we must take up for the benefit of future generations. With clear objectives and applying the means for success,the Multi-Year Energy Program (PPE) exemplifies our political resolve to reach our goals."

Is Guadeloupe a renewable country?

Guadeloupe has a large portfolio of renewable generating capacity,with 112.8 MW installed as of 2013. It also has a diverse portfolio,both in terms of generation types and facil-ity ownership.

Does Guadeloupe rely on imported fuels?

Nevertheless,Guadeloupe's reliance on imported fossil fuels--more than half of the island's electricity is generated from imported petroleum-based fuels--leaves it vulnerable to significant disruptions in shipping or the availability of import facilities.

Hydroelectricity is a renewable energy with a long history and some of the sector's lowest production costs. Despite great potential, this resource is underdeveloped in Guadeloupe and accounts for only 1% of total electricity generated. Responding to Stiff Challenges Helping Reach Guadeloupe's Energy Goals

In 2021, electricity consumption in Guadeloupe primarily relied on fossil energy, which accounted for more than half, almost two-thirds of the total electricity used. In contrast, low-carbon energy sources made up roughly one-third of the electricity mix, with biofuels, wind, solar, and geothermal each contributing a portion. Biofuels were the most significant among the low-carbon sources ...

Suppliers may (1) simply bill for forward net energy, (2) bill for forward energy and give partial credit for reverse energy, (3) give credit for reverse energy but carry net credit to the next billing period, (4) pay the consumer for net reverse energy, (5) base the billing policy on the time of day, (6) do something else.

Bouillante is currently the only geothermal power plant in the Caribbean. Since Bouillante 2 came on line in 2003, total production has risen to 15 MW, accounting for 5% to 10% of electricity produced in Guadeloupe (depending on the year). Geothermal energy is especially attractive since Guadeloupe is an archipelago.

This profile provides a snapshot of the energy landscape of Guadeloupe, an overseas region of France located in the eastern Caribbean Sea. Guadeloupe has set a target to achieve 100% energy independence by 2030. As of 2018, 21% of Guadeloupe's electricity was generated by renewable energy. Created Date: 11/5/2020 1:34:48 PM

Electricity generated here accounts for 5% total generation in Guadeloupe. Cyclical phenomena brought down production between 2007 and 2010, but production has rebounded since 2013 even though major refurbishing and maintenance work have prevented the plant from reaching its maximum potential of 100 GWh. ... Geothermal energy is especially ...
