Diarona is able to finance the district cooling plant without any financing from the client Metering & Billing System 100% smart meters. Complete metering and sub-metering solutions ...

District cooling is a plant system that supplies chilled water produced by a central plant to multiple buildings through pipelines. By consolidating the cooling facilities and increasing their capacity, it is possible to improve the efficiency of energy use and achieve better usage of floor area compared to having such facilities in individual buildings.

With temperatures that can reach to almost 50°C in the summer, the need for cooling capacity in the Gulf States is enormous. Air conditioning in this part of the world consumes almost 70% of the energy produced. Consequently, cooling solutions designed to use only half the energy compared to other air-conditioning systems are bound for success.

Our recent milestone achievement with the launch of Diarona District Energy Limited, a joint venture,

Guam diarona district energy limited
