

What is the National Energy Plan of Guatemala?

New techniques and technologies will be needed to decarbonise these areas. The National Energy Plan of Guatemala defines the promotion of renewables as a priority. The plan aims to promote the use of clean and environmentally friendly energy for domestic consumption without losing sight of energy security and the need for supply

How much electricity does Guatemala have?

As of 2020, Guatemala had 4110 MW of installed electrical capacity, based primarily on hydro power (38.38%), fossil fuels (30.36%), and biomass (25.20%). Other renewable sources represented a much smaller percentage of capacity, including wind (2.61%), solar (2.25%) and geothermal energy (1.20%).

What is Guatemala's energy source?

This page is part of Global Energy Monitor's Latin America Energy Portal. In 2018, Guatemala derived 57.43% of its total energy supply from biofuels and waste, followed by oil (29.54%), coal (7.68%), hydro (3.22%), and other renewables such as wind and solar (2.12%).

Could energy poverty be impacted by energy development goals in Guatemala?

These are costs that could further burden electricity consumers if not managed efficiently. The government of Guatemala - as well as other governments of transitioning economies - can use frameworks like the one introduced here to better understand how electric sector development goals could impact energy poverty in their countries. 6.1.

Is biomass a source of electricity in Guatemala?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Guatemala: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does Guatemala have a free electricity market?

Guatemala's electricity market has been operating as a free market since 1996, when the activities of the electricity industry were separated, opening the generation and commercialization of energy to free competition.

Through the power purchase agreement, Enel Green Power Guatemala (EGPG) will supply 42 GWh of energy per year to EEGSA, the electricity distributor of the departments of Guatemala, Sacatepéquez and Escuintla. Link copied to clipboard
