## **Gude power Sudan**

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropowerpotential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

## Who is gude?

GUDE has been a manufacturer of innovative equipment for the IT,AV and industrial sectors for over 35 years. We support our customers in optimizing and expanding their IT infrastructures as typically found in network, server and media cabinets. Our common goal: less downtime and lower costs through easy-to-integrate IT solutions. More about us

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problemwith electricity supply. According to the report "Tracking SDG 7: The Energy Progress Report (2021) ",only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren't connected to the national electricity grid.

What is a green and just energy transition in Sudan?

A green and just energy transition in Sudan must take into consideration the importance of formulating policies independent of the imaginaries of the old colonial legacy- a legacy which is based on huge infrastructure and political symbols and icons that serve the elites.

Why is power outage a problem in Sudan?

In addition to the problem of access to the grid, from which the rural population, nomads, and the precarious urban classes in Sudan have continuously suffered, the extent of frequent power outages in urban areas has only worsened in recent years.

Why does Sudan have a shortage of electricity?

In addition to denying more than 60 per cent of the Sudanese people access to the national grid, the relatively large annual consumption rates (averaging 10 per cent) worsened the national supply gap. As a result, the energy sector was under pressure to provide more electrical capacity.

Protect your IT and AV installation with GUDE"s high-quality Expert Power Sequencers. These switched PDUs are quick to commission, easy to use and have reliable switching functionality. 6-fold switched Power Sequencer IEC Part number 8112-2 Input current 16 A, 110-230 V

Die Expert Power Control 8031 ist eine hochmoderne, netzwerkfähige Steckdosenleiste mit 8 rückseitigen Lastausgängen, die sich ideal für AV-Anlagen, IT-Installationen und Rechenzentren eignet. Diese intelligente PDU ermöglicht das bedarfsgerechte Ein- und Ausschalten
