Guernsey powerstation haus

What is a Guernsey power station?
Guernsey power station is a 1.8GW gas-fired combined-cycle power plantplanned to be built in Guernsey County,Ohio,US. The $1.4bn project is being developed by Apex Power Group,a privately-held power facility developer based in Indiana,US,in partnership with Caithness Energy,an independent power producer based in New York.

Who designed Guernsey power station?
Gemma Power Systems,a wholly owned subsidiary of Argan,was awarded the engineering,procurement,and construction (EPC) contract for the Guernsey power station in January 2019. POWER Engineers,a global consulting engineering firm based in the US,is the design engineer for the power station.

Will Guernsey power station be evacuated?
The electricity generated by the Guernsey power station will be evacuatedto the Pennsylvania-New Jersey-Maryland (PJM) Interconnection grid,through interconnection with the existing American Electric Power (AEP) 765kV Kammer-Vassell transmission circuit,which runs through the project site.

How many jobs will Guernsey power station create?
It is expected to create up to 500construction jobs and up to 25 permanent jobs during operations. The Guernsey power station will be built on a 118-acre site in the Valley Township of Guernsey County,near the Utica and Marcellus shale gas development area of Ohio.

Where is Caithness Moxie generating station located?
Caithness recently partnered with Moxie Energy LLC to develop the Caithness Moxie Freedom Generating Station in Luzerne County,Pennsylvania,a 1,029 megawatt natural gas fired generating facility which reached commercial operations in 2018.

New York, NY: Caithness Energy announced today that it has successfully closed a $1.6 billion financing for the construction of a fully-permitted 1,875 megawatt combined-cycle natural gas electric generating facility located in Guernsey County, Ohio known as Guernsey Power Station, clearing the way for the project to move forward to construction. ...

If you"ve ever noticed dark smoke coming from the chimneys at the Vale power station first thing in the morning, you may be wondering why this is happening. After being "parked" overnight for several hours, the diesel-generators need a few minutes to reach the right performance conditions to help power over 30,000 customers, which can sometimes result in ...

Powered by GE"s HA combined cycle equipment, Guernsey Power Station can deliver the equivalent electricity needed to power approximately 1.4 million US homes within the PJM Energy Market, which

coordinates the movement of ...

As previously communicated on November 27, 2023, the 1st unit was expected to restart on November 27, 2023, but restart was delayed. The unit is anticipated to be restarted November 29, 2023, at approximately 7:00am, which requires the unit to be operated on bypass (elevated noise) until the unit is fully back on-line. The elevated noise [...]

Caithness Energy, L.L.C. ("Caithness") is a privately-held Independent Power Producer specializing in the development, acquisition, operation, and management of renewable energy and natural gas development projects. Featured Projects CAITHNESS MOXIE FREEDOM The Caithness Moxie Freedom Generating Station is a 1,029 megawatt state-of-the-art, air cooled, ...

Guernsey Power Station is a state-of-the-art facility designed to maximize power output with minimal impact on the surrounding environment. The plant uses combined-cycle technology consisting of both natural gas-powered ...

BYESVILLE - While driving south through Valley Township on Interstate 77, a giant, looming power station emerges seemingly out of nowhere. After seven years of meetings, planning, and construction, the Guernsey ...

As previously communicated on November 27, 2023, the 1st unit was expected to restart on November 27, 2023, but restart was delayed. The unit is anticipated to be restarted November 28, 2023, at approximately 7:00am, which requires the unit to be operated on bypass (elevated noise) until the unit is fully back on-line. The elevated noise [...]

Guernsey Power Station is a gas-fired power plant located in Guernsey County, Ohio south of Byesville in the heart of the Utica and Marcellus shale region. It generates 1.875 GW of power, the 69th largest power station in the United States. The plant cost $1.7 billion to build. The electric generating facility will sell energy and capacity into the Pennsylvania-New Jersey-Maryland Interconnection (PJM) market. PJM is the regional transmission organization that coor...

As a follow-up to our communication of December 28, 2022, regarding completing steam blows on the first of three units at the facility, Guernsey Power Station (GPS) is pleased to announce the major milestone of completing steam blows on the second of three units at the facility. As been communicated previously, steam blows produce significantly [...]

The 3 rd unit will be shutdown normally on December 9, 2023, for a planned outage to repair some electrical equipment and elevated noise during the normal shutdown may be heard. This outage is anticipated to last approximately seven (7) days. At the end of the outage, the unit will be restarted which requires the unit to be operated on bypass (elevated ...

Guernsey Power Station is a gas-fired power plant located in Guernsey County, Ohio south of Byesville in the

heart of the Utica and Marcellus shale region. It generates 1.875 GW of power, the 69th largest power station in the United States. The plant cost $1.7 billion to build.

About Guernsey Power Station. The Guernsey Power Station is a 1,875 megawatt, natural gas fired energy generation facility that produces electricity roughly equivalent to serve the power needs of ...

Location: Guernsey County, OH EPC Contractor: Gemma Power Systems Design Engineer: POWER Engineers, Inc. Using state-of-the-art combined cycle technology and a dry (air) cooling system, the 1,875 MW, Guernsey Power ...

As previously communicated on July 20, 2023, the 2 nd unit was shutdown normally on July 22, 2023, for a planned eight (8) day outage to align some equipment. PJM cancelled the planned outage without notice and required the 2 nd unit to restart. The 2 nd unit was restarted this morning, July 24, 2023, at approximately 7:00am and therefore, elevated ...

As previously communicated on September 13, 2023, the 3rd unit was shutdown for repair of a mechanical issue. The repair is ahead of schedule and the 3rd unit will be restarted on September 15, 2023, at approximately 9:00am which requires the unit to be operated on bypass (elevated noise) until the unit is fully back on-line.
