Is a Newton battery the future of energy?

Jason Williams says the future of energy isn't solar or wind, but rather a very unique type of energy system called the "Newton Battery". It's unlike anything the world has ever seen before and the little company behind it could soar for 15,900% gains. The Teaser The presentation begins by calling attention to a ...

Why is Guinea a key player in green-energy transition?

KAGBANI, Guinea -- One of the poorest countries on Earth has become a crucial player in the world's green-energy transition. Guinea, a West African nation of more than 13 million people, is home to the world's biggest reserves of bauxite-- a reddish-brown rock that is the main source of aluminum.

Why did Guinea restrict bauxite exports?

Under then-President Alpha Condé, Guinea's government gave a permit to SMB in 2015. Around the same time, Indonesia and Malaysia were restricting their own bauxite exports because of concerns over, respectively, foreign exploitation of resources and environmental degradation.

When did SMB ship bauxite from Guinea?

SMB shipped its first ton of bauxite from Guinea within six months, even before the Environment Ministry had concluded its impact assessments, rights activists said.

Is bauxite mined in Guinea?

The aluminum supply chain for American automakers, including Ford, General Motors and Tesla, includes bauxite mined by both of the major producers in Guinea, according to a 2021 report by Human Rights Watch and Inclusive Development International, a U.S.-based advocacy group that aims to defend communities threatened by corporate development.
