

What is Solarman smart?

SOLARMAN Smart is a brand new smart energy management application, which is specially designed for global household owner users. With full-on visual experience, user-friendly data display and all-round monitoring functions, SOLARMAN Smart makes smart energy management easier for everyone. Why Choose SOLARMAN?

What products does Solarman offer?

offers a complete solar monitoring & management hardware products include various data logger, smart meter, weather station, optimizer, rapid shutdown and so on. SOLARMAN brings comfortable and eco-friendly life to global users. SOLARMAN has established a close cooperation relation with ZCS in Italy, CORAB in Poland.

What is Solarman solution?

SOLARMAN solution covers whole life-cycle of devices, capable of smart product management and remote problem-solving. SOLARMAN empowers PV professionals such as installers, O&M service providers and distributors, to streamline business process, to realize highly efficient O&M by cutting-edge technologies.

Does Solarman support OEM & customized services?

All SOLARMAN hardware & software products can support OEM and customized services. SOLARMAN monitoring and management system is compatible with all major inverter/device brands all over the world. We can facilitate your centralized remote monitoring and management of your equipment, providing great convenience for your operation and maintenance.

What services does Solarman provide?

Experienced technical engineers will provide online instant Q&A and remote trouble shooting services for global customers. SOLARMAN will provide field services for product installation and commissioning. Notice: Extra fees will be charged for field service overseas.

What is Solarman energy management device?

SOLARMAN energy management device is specially designed for distributed residential/industrial & commercial plants. With its brand new design, it features in high reliability, high accuracy and high efficiency. SOLARMAN stick logger supports GPRS, WiFi, 4G, Ethernet and other communication method.

Sure, just go to <https://home.solarmanpv> and create an account and pair it with your inverter hardware (similar to what you probably already did with the smartphone app) Use the credentials of your just created account for the api access (email, password) The password must be hashed using e.g. SHA256 Online as already mentioned above. Then you ...
