

Guinea zonergy baldr

What is Guinea's energy strategy?

Includes a market overview and trade data. The Guinean government has announced a long-term energy strategy focusing on renewable sources of electricity including solar and hydroelectric as a way to promote environmentally friendly development, to reduce budget reliance on imported fuel, and to take advantage of Guinea's abundant water resources.

What type of energy is used in Guinea?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Guinea: How much of the country's energy comes from nuclear power?

Can China make Guinea an energy exporter in West Africa?

The Chinese mining firm TBEA is providing financing for the Amaria power plant (300 MW, USD 1.2 billion investment). If corresponding distribution infrastructure is built, and pricing enables it, these projects could make Guinea an energy exporter in West Africa.

Is Guinea a potential exporter of power?

Guinea's hydropower potential is estimated at over 6,000 MW, making it a potential exporter of power to neighboring countries. The largest energy sector investment in Guinea is the 450 MW Souapiti dam project (valued at USD 2.1 billion), begun in late 2015 with Chinese investment.
