

Who owns the electricity industry in Guyana?

The electricity industry is operated by the state-owned electricity company, Guyana Light and Power Inc. (GPL), with an installed operating capacity of 337 MW in 2020.

How will Guyana contribute to greener energy use?

This, he noted, will contribute to cleaner and greener energy use across the nation within the decade. By 2030, Guyana aims to produce 500 MW of electricity by embracing an energy mix composed predominantly of clean energy sources. Doing so would accommodate the growing demand for electricity while remaining environmentally conscious.

Why is the energy sector important in Guyana?

The energy sector, the Prime Minister explained, is the lifeblood of any nation's development. "It is the bedrock upon which our economic prosperity, social progress, and wellbeing of our people depend." He said that tremendous improvement has been made by the Guyana Power and Light (GPL) since the current administration took office.

What is the future of energy in Guyana?

The development of alternative renewable energies, such as solar, wind, hydropower, and biomass technologies, remains a key priority for the future growth of the energy sector in Guyana. Government of Guyana has committed to reducing the cost of electricity by at least 50% over the next five years (Budget 2022).

Could a gas-to-power project improve Guyana's Electricity Reliability?

Guyana's plan to improve the reliability of its electricity and lower the cost of electricity through a gas-to-power project could be a critical pillar that ensures that the benefits of natural resource exploitation are broad-based this time around. The gas-to-power project has two phases:

How will a gas to power project impact Guyana?

The gas to power project will have significant transformational benefits for Guyana: The gas to power project is expected to support diversification and a competitive economy. Investment in gas to power generation to lower electricity prices could foster development in new industries and sectors.
