You can also compare hundreds of car hire companies in one go so that you get the best car rental price for your trip.

The Philippines has a population of 115 million people across over 7,500 islands; geographical location can make total electrification difficult - especially on a single central grid. Therefore, microgrids that serve local communities have been gaining traction. These systems easily incorporate solar power to ensure access to clean energy.

The McDonald Islands archipelago is a group of small, rocky volcanic islands that are situated approximately 44km to the west of Heard Island. The archipelago comprises McDonald Island, Flat Island, and Meyer Rock which collectively occupy an area of 2.5 sq. km.

Discovered in 1854 by Captain McDonald the islands were positioned by sightings from Heard Island in 1948 and shown as 5 separate islands on chart AUS 08 published in 1949. In 1971 a sketch map was drawn by Natmap following a visit by the French ship Gallieni compiled from hand held oblique photography taken from a helicopter.
