

# Heart-warming solar home power station

What are solar powered portable power stations?

These solar-powered portable power stations keep your batteries full during power outages and off-grid campouts. These days, gas-powered generators aren't the only option for charging on the go. Solar-powered generators--also called portable power stations--are a growing sector of the power market.

What makes a good solar power station?

One of the most important aspects of any solar power station is how well it can interface and charge from various types of solar panels. In some cases, a solar power station might not be able to accept different types of solar panels or may be locked to its own brand's solar panels through a proprietary connection.

Can a solar powered generator power a house?

A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage. And the fact that these are solar-compatible means you aren't reliant on the electrical grid to recharge them. What is the best way to charge a generator?

Which solar powered generator is right for You?

If you need something portable for a camping trip, then the Jackery 500W might be your best new travel buddy. When deciding what solar powered generator is right for you, consider which types of appliances, tools, and devices you need to charge and how often you'll be without a traditional power source.

Do solar panels need a power station?

Solar panels without a power station are not particularly useful, so the term "solar generator" typically refers to both the panels and the station used in conjunction. What Size and How Much Capacity Do You Need? One of the main differences in these models is how much charging "juice" they can store, referenced in watt-hours.

How do you charge a portable solar power system?

Other people use them to power speakers while tailgating, or integrate them into van build projects. Most portable solar power systems -- aka solar generators, power stations, portable power banks or battery boxes -- can be charged via solar panels, a wall plug or a 12-volt car outlet.
