How Far Apart Do Solar Panels Need To Be On A Pole Mount? Solar panels on a pole mount should have a gap of 2 to 12 inches between adjacent edges and frames. A distance of 4 inches around all sides is optimal for airflow, cooling, and unshaded solar exposure. More spacing may be required to route conduit or provide access paths between panels.

DUSOL's - sister company of MAXIMA with manufacturing facility in UAE - Standard range of solar panels are made using standard cells without making any alteration to the cell's physical ...
