

Home solar systems in Vatican City

How much solar energy does the Vatican produce a year?

Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal State has been producing 300 MWh of solar energy every year since its installation in 2008. The project was planned and managed by BayWa r.e. with the PV modules, inverters and its installation donated by solar technology provider, SolarWorld.

How can the Vatican save CO₂?

In the heart of the Vatican, we converted 2,134 m² of idle roof space into a source of green renewable energy. The energy produced by this plant is directly fed into the Vatican's grid, helping to save around 225 tons of CO₂ each year.

Why did Pope Francis embrace solar power?

In Fratello Sole, Pope Francis roots the decision to embrace solar power in his own invitation "to all mankind," in the encyclical *Laudato si'*, to make lifestyle changes to counter global warming and the "pervasive" use of fossil fuels.

Is Vatican City the greenest state in the world?

Vatican City may be the smallest sovereign state in the world, but it is also one of the greenest. It has long been an exemplar for tackling climate change through its approach to renewable energy.

High-Efficiency Solar Panels: We use top-quality, high-efficiency solar panels that are designed to withstand Ghana's weather conditions, ensuring durability and reliability over time. **Customised System Design:** Each system is crafted based on your specific needs and property layout to deliver optimal performance.

The pope has delegated Vatican governing bodies to work with the Italian government to build an agrivoltaics system in the lands of Santa Maria di Galeria, located outside of Rome and an extra-territory of Vatican City.
