Blue Sky Energy Technology makes saving energy simple and fun. Through an easy-to-install energy sensor and the Blue Sky Guardian app, people receive data insights on their energy consumption and customized tips to live or work comfortably with less energy.

Waterotor is a breakthrough patented hydrokinetic technology that converts over 50% of the available energy in slow moving water (streams, rivers, canals and waterways) into electricity at speeds as slow as 3.2 km/h (0.9 m/s). Address: 236 Metcalfe St, Ottawa, ON, K2P 1R3 CANADA; Phone: (613) 747-2460; Email:

The small, rolling drum-like device called the Waterotor, created by Fred Ferguson, CEO of Waterotor Energy Technologies is capable of harnessing energy from water currents moving at just one to six miles per ...

Waterotor's breakthrough patented, economically disruptive, clean technology converts low-head, low-flow energy in rivers, canals, ocean currents, and tidal flows into 24/7 on- and off-grid ...

Waterotor's breakthrough patented, economically disruptive, clean technology converts low-head, low-flow energy in rivers, canals, ocean currents, and tidal flows into 24/7 on- and off-grid ...

Waterotor International Corp., a hydrokinetic energy company, has released its Megarotor system design. The 20 MW Big Cajun is the first hybrid ocean system that simultaneously extracts energy ...

Waterotor Energy Technologies Inc. is an Ottawa-based company bringing the power of hydrokinetics to a global market. Since 2011, Waterotor has invested over \$10 million in research and development to capture the energy from slow-moving water. Now the company has a highly valuable IP portfolio and breakthrough technology that "converts over ...

The Waterotor is a new breakthrough technology that converts more than two thirds of the available energy to electricity when submerged in water flowing even as slowly as one mile per hour.

Waterotor Energy Technologies Inc. has developed and demonstrated a unique technology for cost-effective continuous sustainable renewable electrical energy. The Waterotor combines hydrodynamic torque-generating blades that create ...

Waterotor Energy Technologies, Inc. sells, builds and installs 20kw Waterotor units throughout the world, with initial emphasis on energy requirements of Pacific Island nations. Island nations ...

Currently, under development in Louisiana, the Big Cajun is Waterotor's first commercial ocean deployment. Its first application allows big oil to reduce its carbon footprint and drastically reduce costs by replacing diesel-generated electricity production on platforms that each consumes 33,000 gallons of fossil fuel per day at an annual cost of over \$70 million. "Waterotor"s ...

Waterotor Energy Technologies Inc. - Waterflow Becomes Power - Waterotor Energy Technologie s Anthony J. (Tony) Asterita Washington DC Operations 1108 Villamay Blvd. Alexandria, VA 22307 703-768-3580; tonyj@waterotor 16 March 2012 . Waterotor . Briefing to the Offshore Renewables Task Force; National Ocean Industries Association

Accessible and affordable electricity is a major global issue. There are 1.2 billion people are without electricity, and over 800 million people depend on high cost, polluting fossil fuel generators for their power. However, over 71% of the planet is covered with slowly moving water in rivers, canals, and ocean currents - an available but untapped source of power. A huge, ...

The closer the PUE is to 1, the more efficient is its usage of energy. About The Hong Kong University of Science and Technology The Hong Kong University of Science and Technology (HKUST) (<https://hkust.hk/>) is a world-class university that excels in driving innovative education, research excellence, and impactful knowledge transfer.

Founded in 2011, Waterotor is an IP development and systems management company responsible for the development of an advanced, precisely defined, patented, proven, small to large version technology. Waterotor's breakthrough, economically disruptive clean technology converts low-head, low-flow energy in very slow moving water into affordable ...
