

# How long does it take to get a return on investment in 3g solar power generation

What is solar return on investment (ROI)?

Return on investment (ROI) is related to the solar payback period. Instead of calculating the time it takes to break even, ROI calculates the total amount of money and savings that a PV array will provide over its lifetime. Here is a simplified version of this calculation: Lifetime utility costs - lifetime cost of solar = Solar System ROI

What is the average solar payback period for EnergySage customers?

The average solar payback period for EnergySage customers is under eight years. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment. Your solar payback period is the time it takes to break even on your initial solar investment.

How do you calculate solar power ROI?

The average solar power ROI is around 10% but depends on the size, performance, efficiency, and location of the system. To calculate solar panel ROI, divide your net profit over the lifetime of your solar panels by the combined cost of purchase and installation, then multiply by 100. So, Is Investing in Solar Power Worth It?

How long do solar panels last on EnergySage?

That's the average payback period on EnergySage. At the end of those 7.5 years, your solar panels will have saved you enough money on your electric bill to cover the upfront cost of your system. Year eight in the example is when you technically start saving money, having finally broken even on your investment.

How do you calculate solar payback?

To calculate your solar panel return on investment (ROI), subtract your solar payback period from 25 (the expected number of years a solar panel lasts). Multiply your result by your annual energy cost. For example, 25 minus your solar payback period of 11 is 14.

How does a solar system affect ROI?

**Upfront Costs:** The initial investment includes the cost of solar panels, installation, inverters, and associated equipment. Selecting the right system size and components can impact your ROI. **Energy Savings:** The amount of money saved on energy bills over the solar system's lifespan is a significant contributor to ROI.
